Series Webinar.

Join a radiologist, urologist, and prostate cancer survivor for an informative community conversation and live Q&A.

PANELISTS

Dr. Robert Princenthal

Medical Director, Prostate Imaging, RadNet

- **The Importance of Early Detection** – How advanced imaging is helping detect prostate cancer earlier and more accurately.
- **Beyond the PSA Test** – The role of prostate MRI and other imaging technologies in diagnosis and treatment planning.
- **What's New in Prostate Cancer Imaging** – Advances in MRI, AI, and imaging that are changing the way prostate cancer is detected.

Dr. David Josephson

Urologist & Robotic Surgeon, Tower Urology, Los Angeles

- **Understanding Your Treatment Options** – From active surveillance to surgery and other therapies, how treatment decisions are made.
- **What Happens After an Elevated PSA?** – When to see a urologist and what patients can expect during the diagnostic process.
- **Prostate Health at Every Age** – Risk factors, prevention, and when men should begin talking with their doctor about screening.

Barry Katz

Prostate Cancer Survivor

- **My Personal Journey** – From screening and diagnosis to treatment and recovery.
- **Lessons Learned** – Advice, challenges, and what I wish I had known from the beginning.
- **Living Beyond Prostate Cancer** – Life after treatment, maintaining quality of life, and encouraging others to be proactive about their health.
